

## Why buy your new computer from One36 Computing?

7 very good reasons!

1. Private consultation with an IT expert giving impartial, honest advice in a language you can understand. No cost or obligation.
2. We can supply all types of computers, both PC and Apple, as well as all tablets including iPads. The only question is, which one is right for you?
3. Set up of your new computer so your user account is created, security software installed and all necessary updates carried out. All you need to do is switch it on!
4. Recovery disks created and supplied (where applicable) so if you ever need to start again from scratch everything is ready for you.
5. Seamless transition from your old computer to your new, with all documents, photographs and emails transferred - so you can simply carry on from where you left off.
6. All software, recovery disks and warranty information supplied in a complimentary document wallet for you to keep all those important items safe and handy.
7. If some things about the new computer are unfamiliar we can provide you with one to one tuition to quickly get you up to speed.

Take the fear out of buying a new computer. With One36 Computing it's straightforward all the way!

### Latest Testimonial....

*I should like to thank you all for the hard work you put in to provide and install the new computer system. Nothing was too much trouble, and for the first time I have the kind of professional computer set-up I have always wanted. The system is working perfectly, and the configuration is ideal for moving seamlessly between applications (the envy of all who visit!). Bojan took great care to ensure that everything was fully operational before he left (including migration of all data), and patiently dealt with several 'daft laddie' queries in follow-up sessions.*

*All in all very impressive!*

*Regards*

*Mike*
